After line 3, insert "a processor having at least;"

6. Applicant's response, filed 7/23/2007, with respect to claims 1-25 has been fully considered and is persuasive. Page 13 of said applicants response are helpful in clarifying the record of the prosecution by clearly distinguishing the differences between the present application and the prior art.

The cited prior art taken alone or in combination fails to teach or reasonably suggests *the in-loop process frequency collection portion further determining whether said loop process frequencies are higher than a predetermined reference frequency, and said in-loop process frequency collection portion determines number of times of execution of said each of a plurality of in-loop processes if said process frequencies are*

*higher than a predetermined reference frequency* as recited in claim1. Similar concepts are found in the independent claims 13,15-17 and 19 –25.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reason for Allowance."
